

Introduction

Placed based working in locality areas is a priority for both Government and local areas with the focus on person-centred, bottom up approach to meet the unique needs of local people. Place based working is at the heart of devolution, and one year on from the signing of deals, we explore the journey to a place where public services: are integrated, intervene early, and work collaboratively with the people who live and work locally.

This unique event is organised by iNetwork with the support of GMCA's Public Service Reform team, Advancing Quality Alliance. It will be the best opportunity to engage with leaders and decision makers in the North of England this year.

Why sponsor this event?

Over 280 people from 140 organisations attended our flagship conference last year and we are building on that success. The event will include influential expert speakers at a time when public sector organisations are looking to work with partners to commission and deliver cost-effective services that work for their citizens and the wider community.

Attendees will include Chief Executives, Directors, Service Heads, Leaders from local authorities, NHS Trusts, Fire & Rescue Service, Police, Housing, central government departments, national/ regional bodies, voluntary and not-for-profit sector, etc.

Sponsor opportunities

There are a limited number of speaking and exhibition sponsor opportunities for this event. Please contact us at sponsorship@i-network.org.uk to discuss how this event could benefit you.

iNetwork is a public sector partnership and does not seek to make a profit - income from events such as this helps to sustain the programme. More information on iNetwork is available at www.i-network.org.uk.
